

**MEMORANDUM NO. 2023-58**

**TO : ALL ELECTRIC COOPERATIVES (ECs)**

**Attention : ISD/MSD Managers**

**SUBJECT : 2024-2028 Projected Number of Potential Consumer Connections**

**DATE : DEC 12 2023**

In line with the assumptions made in crafting the Total Electrification Plan by 2028, the projected number of potential consumer connections were computed based on issuances of the Philippine Statistics Authority (PSA) and application of linear programming.

For harmonization of targets and monitoring of accomplishments towards total electrification, **all ECs are encouraged to adopt and consider the projected potentials** vis-à-vis accomplishments in consumer connections, preparation of Local Total Electrification Roadmap (LTER) and Distribution Development Plan (DDP), among others.

Beginning January 2024, the Connections DET as uploaded in the NEA-Business Intelligence Technology (NEA-BIT) portal and Barangay Energization Matrix (BEM), thereto, should reflect the projected number of potential connections. Each EC will be rated accordingly for the Annual EC Overall Performance Assessment (Memorandum to ECs No. 2023-21) under Parameter - Level of Electrification.

The projected number of potential consumer connections per city/municipality and breakdown per barangay are now available and can be downloaded through <https://tinyurl.com/2wf3s8ca>.

For assistance and concerns, please contact Mr. Jovani B. Lagon at CP/Viber No. 0961-5953761 or through email at [neadmecd@yahoo.com](mailto:neadmecd@yahoo.com).

For strict compliance.
