

15 May 2024

INSTITUTIONAL ADVISORY NO. 06
Series of 2024

TO : ALL ELECTRIC COOPERATIVES (ECs)

SUBJECT : CONDUCT OF BASIC LINeworkERS TRAINING COURSE FOR ECs

The National Electrification Administration (NEA), in partnership and collaboration with the Technical Education and Skills Development Authority (TESDA), PHILATMEC and EC Technical Experts, is presently crafting a Unified Competency-Based Curriculum and Competency-Based Learning Module for Electric Power Distribution Line Course (EPDLC).

The Technical Experts/Trainers have ascertained the need for the review of the existing Training Regulations (TR) to adapt to the changes and advancement of technology. Thus, the NEA-EC Training Institute (NETI) has coordinated with TESDA so that the skill sets embodied in the TRs shall be consistent with international standards.

Thus, all ECs are hereby forewarned against attending training courses which do not comply with the standards prescribed by the NEA and TESDA.

All ECs are hereby directed to coordinate with NETI for the following matters:

1. List of TESDA-certified trainers and assessors;
2. Request for conduct of lineworkers' trainings; and
3. Request for assistance in the accreditation of training and assessment centers.

For information, guidance and strict compliance.

OMAR M. MAYO
Deputy Administrator
Electric Cooperative Management Services
