ADVISORY

TO : ALL OUR STAKEHOLDERS

As an aftermath of typhoon Ulysses bringing damages and destruction to infrastructures, a crucial component of NEA's existing server network system facility was not spared. A more thorough assessment and diagnosis of the damages to NEA's Legacy Hardware System where data/information of NEA's Electronic Messaging System, Network Directory Services and NEA-BIT shared folders are housed is still on-going. However, initial reports point to no band-aid solution in the near term.

Currently, ALL email addresses linked to the NEA Server Outlook with the extension filename, "nea.gov.ph." are not functional. In this regard, to allow continuity and exchange of official information you may direct your inquiries, letter- requests, submission of Electric Cooperative board resolutions and other concerns (**except Data Entry Templates of NEA-BIT**) to our temporary email address: **nearecordsunit@gmail.com.**

Please be guided accordingly.

RODERICK N. PADUA
Department Manager
Information Technology and Communication Services
